

## **Water Delivery Update**

Due to our limited water supply and the way water accounting is calculated, the District will begin shutting down the Interstate Canal on Thursday, August 6, at 12:01 a.m. This is one day earlier than originally anticipated.

The District will make every effort to keep the High Line Canal operating as long as possible. However, by August 8, most canals within the system are expected to be shut down.

The Low Line Canal will continue operating because of its delayed start caused by the June storm damage and subsequent repairs. If we are able to maintain sufficient volume from Lake Minatare, we anticipate the Low Line Canal will continue to operate through August 15.

We understand this has been an extremely difficult irrigation season. We sincerely appreciate the patience, cooperation, and outstanding water management efforts of our irrigators throughout this challenging year. Thank you for working with us as we navigate one of the most difficult water supply seasons in recent history.
